iBeacons ATTENDANCE
MONITORING OVERVIEW

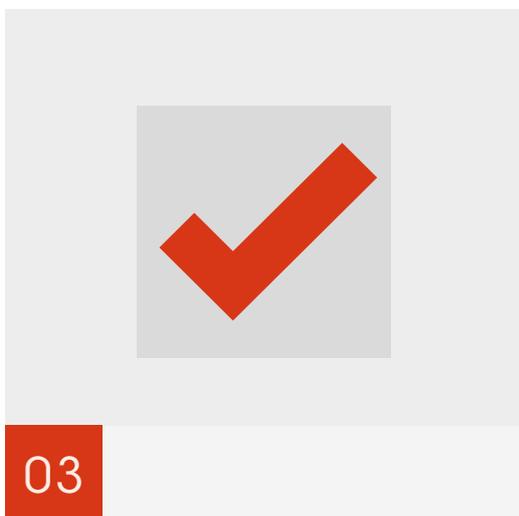

Universities need to record student attendance in lectures, but traditional electronic systems are typically expensive and difficult to set up. campusM Attendance Monitoring offers a simple cost effective solution.

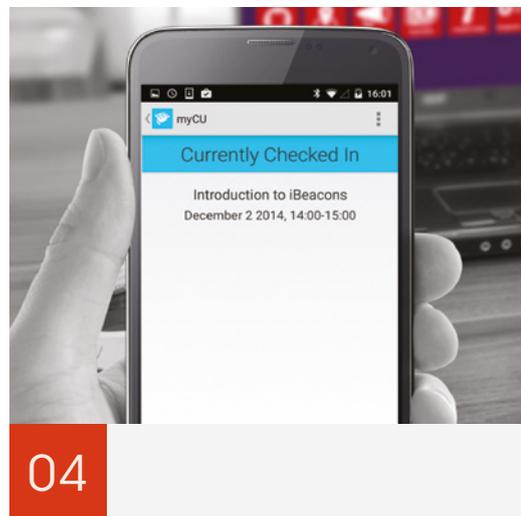

A student enters a teaching space.

The iBeacon triggers the student's app to check if they have a class running in that room.

If so the student's attendance is recorded.

The student receives a push notification informing them that their attendance has been recorded.

FEATURES OF campusM ATTENDANCE MONITORING

Quick and simple to set up in any type of space

Cost savings over swipe card systems

Time savings over paper registers

No need for internet or power connection

No support required from academic staff

Available as a stand alone solution or as part of a campusM deployment

It's that easy.
There is minimum support needed from academic staff - it just works.

FREQUENTLY ASKED QUESTIONS

■ What are iBeacons?

iBeacons are small physical devices that can be placed anywhere - on a wall, ceiling, even on a computer.

They enable mobile devices to understand their position on a micro-local scale using Bluetooth Low Energy (BLE). They don't need an internet connection or power in order to work, and have a long battery life of up to 3 years.

■ Do students need to be connected to the internet to register attendance?

No - there is no need to have a live connection to the internet.

■ What if there is no wifi connection in the room?

It doesn't matter - iBeacons use Bluetooth Low Energy (BLE) so do not require an internet connection.

■ What about students who don't have a smartphone?

Research shows 94% of students have a smartphone compatible with iBeacons. For the minority who do not, we offer alternative ways to register attendance.

■ What happens if the location of the class changes?

It's easy - the students will be asked to confirm the room that they have been moved to.
